RE: 53rd St & Flagg Creek Watermain Project Temporary Easement Agreements

Recommendation

Consider a recommendation to approve temporary construction easements for 5301 Commonwealth Ave and 5300 Fair Elms Ave for the purposes of installing a new watermain along 53rd Street, pending final easement language and approval.

Summary

Municipal Services staff are currently working with V3 Companies, the engineering firm managing the 53rd Street Water Main Replacement Project, to develop temporary construction easements (TCE) for the installation of the new watermain. Due to the location of the existing watermain that runs north/south on Commonwealth Drive and the proposed location for the new watermain south of the 53rd Street bridge, some construction activity will need to take place on private property, outside the Village's right-of-way.

Village staff expects to receive the legal language for the TCE's the week of October 6th and would like to present the proposed language to the Village Board for approval on October 13th to allow for the project to begin in October, with the goal to be completed before Thanksgiving.

Attached Exhibit 1 shows the proposed locations of where the TCE's will be approximately located. Final details and locations are currently being prepared by V3. All locations within the project area, including private property, will be fully restored.

RE: Municipal Services Department - 2026 Preliminary Budget Introduction

Recommendation

N/A

Summary

Operational and capital planning budgets for the Municipal Services Department are currently being finalized by staff, but preliminary project information is available for the Committee's discussion for the October meeting cycle. The projects presented are not complete nor are they reflective of all projects that are currently under consideration.

The Municipal Services Department has the largest capital and operating budgets covering multiple funds. The Public Works & Water Committee reviews the following budget accounts:

- 4102370 – Motor Fuel Tax (MFT)
- 4301510 – Water Administration
- 4302510 – Water Production
- 4303510 – Water Distribution
- 4304510 – Water Meters
- 4401515 – Sewer Administration
- 4402515 – Sewer Maintenance
- 4801365 - Referendum

Attached for the Committee's review is a preliminary list of capital improvement projects under consideration with a preliminary project cost estimate if available. Staff has highlighted those projects which are cohesive with one or more of the strategic plan goals.

Referendum and Roadway Referendum – 365

4801365 60011 – Construction

Village staff are currently completing project scoping studies with four (4) engineering firms for projects identified in the 2025 Referendum. It is anticipated that projects for 2026 will focus on the reconstruction of Woodland Avenue from 47th to Burlington, which includes water main and combined/storm sewer improvements. Additional asphalt resurfacing in the Old Town North, Field Park and Ridgeacres subdivision with some projects including water main replacement, are also expected. Preliminary projects in the Safe Routes to School (SRTS) Travel Plan also outline new sidewalk infill projects for consideration in Old Town North and Forest Hills, which will be included in the FY2026 budget.

Potential project costs range from approximately \$1.2M in asphalt resurfacing for streets without watermain improvements to \$11.9M for resurfacing with water main improvements. It is not feasible to complete all projects in the first year and staff will continue to work with the engineering teams to develop engineering and construction schedules. The Woodland Avenue reconstruction project will be bid this fall and engineering estimates for construction are \$2.3M.

Motor Fuel Tax– 370

4102370 60011 – Motor Fuel Tax Current

Prior to the passage of the 2025 capital improvement referendum, the Village utilized MFT funds for resurfacing streets. The Village annually receives approximately \$600,000 in Motor Fuel Tax (MFT) funds. Around \$300,000 of the annual MFT funds are allocated to public right of way maintenance and capital needs such as roadway salt, sidewalk maintenance, asphalt patching, and similar services. Those funds are anticipated to continue to be spent out of the MFT fund for 2026 and roadway improvement projects will be re-allocated to the Referendum Fund.

Water Production - 4302

4302510 62015 – (Water) Building and Building Improvements

In August, the Village completed an assessment of the operational equipment for the water treatment plant with Carollo Engineers. That report was presented to the Infrastructure Commission on September 25th. The report outlines several assets within the plant that were identified for immediate attention, most notably the replacement of the Amiad Iron Removal filters. While they have an estimated eight (8) years of life remaining, they have been identified as a prior item in previous capital replacement targets due to their age, limited parts/support

and their design and service based out of Israel. Additional items included for immediate attention include Well #1, which is currently undergoing a decommissioning study with Baxter & Woodman.

Notable projects identified in the report for immediate attention include the following

Well 3 Electrical Overhaul, Low Volt Trans, and ATS	\$200,000
<i>Well 5 Surface Piping</i>	\$100,000
<i>MCC 1</i>	\$100,000

Water Distribution– 4303

4303510 62020 – Water System

The Village was notified in July that it did not receive initial funding from the IEPA low interest loan program for lead service line replacement for 2026. The Village is hoping to be included in bypass funding, which would be announced in January. Based upon the bid information from the 2025 replacement program, the Village is budgeting \$1.1M for lead service line replacements. The Village remains legally obligated to replace 7% (~45 services) of its lead inventory per year.

Additional projects include approximately \$300,000 for a valve exercising and replacement program and approximately \$400,000 to line the main transmission from Well #4.

Baxter & Woodman is also currently completing a well assessment study for the Village’s wells, and it is anticipated that a recommended action for the future of Well #1 will be included in the 2026 budget. Staff included \$150,000 in 2025 for the decommissioning of that well, and anticipates a similar number for the 2026 budget.

The Village Board also authorized \$50,000 in 2025 for a lead service line replacement cost share program, to allow residents to receive up to \$5,000 if they replaced their lead service line on their own. Staff will be reviewing those utilization numbers in November and determine if any adjustment may be recommended for the program.

Sewer Fund/Storm Water Fund

4402515 62025 – (Sanitary) Sewer System

The Sewer System account anticipates approximately \$400,000 in budget projects for sewer

point repairs and other smaller projects. The majority of larger capital improvements, including sewer lining, new storm sewer, etc. will be incorporated into the Referendum Fund when work aligns to a roadway improvement project.

4402515 62025 – (Storm) Sewer System

The storm sewer system fund anticipates construction costs for the storm sewer improvements on Woodland Avenue (Burlington to 47th Street) along with the stormwater improvement project along Ridgewood Drive. Those two projects total approximately \$2.8M in improvements. Construction of the Springdale Detention Basin will continue into 2026 and funds will be allocated for next year.

Additional projects indemnified for 2026 include \$75,000 for replacement of the pumps at the Fair Elms lift station, and \$75,000 for rehabilitation for the outfall for CSO #3 located near 48th Street and Flagg Creek.

RE: Succession Agreement with Water Services

Recommendation

Consider a recommendation to approve the succession contract with Water Services, Inc. and approve the Q3 unit pricing for the installation of MIU's, water meters, associated parts and labor costs.

Summary

On July 28, 2025, Water Resources, Inc. was acquired by Ferguson Enterprises, LLC. (Ferguson). Water Services provided all the installation of the replacements and was (DBA of Water Resources, Inc. In the acquisition, Water Services, Inc. did not remain with Ferguson Enterprises, LLC.

As a result, a new vendor contract for the replacement of the remaining water meters is required and will be valid until the end of 2025, as per the original agreement with Water Resources, Inc.

The Village will bid for the work needed in 2026 for the remaining replacement and installation of older Sensus meters that meet the recommendation requirements to be changed.

RE: 2026 State of Illinois Salt Purchase

Recommendation

Consider a recommendation to waive the competitive bidding process and approve and authorize the execution of the State of Illinois Contract for the FY 2025-2026 Salt Purchase with Morton Salt, Inc. for an amount not to exceed contract value of \$100,000.

Summary

Attached for the Committee's review, and consideration are finalized documents from the State of Illinois for the rock Salt State purchase for 2025-26.

The Village of Western Springs, along with approximately 494 other communities and governmental organizations in Illinois, participate in a joint purchasing program for road salt. Cargill, Inc. and Morton Salt were jointly awarded the state contract for 2024-25. The Village's unit pricing for 2023-2024 was \$63.89 per ton for 900 tons. The 2024-25 pricing is \$64.53 per ton for 900 tons. Per the State contract requirements, the Village is required to accept at least 80% of the order and may request additional salt above the 900 tons as demand and supplies allow.

Contract

JPMC Rock Salt, Bulk FY26

25-416CMS-BOSS4-P-85804

The Parties to this contract are the State of Illinois acting through the undersigned Agency (collectively the State) and the Vendor. This contract, consisting of the signature page and numbered sections listed below and any attachments referenced in this contract, constitute the entire contract between the Parties concerning the subject matter of the contract, and in signing the contract, the Vendor affirms that the Certifications and Financial Disclosures and Conflicts of Interest attached hereto are true and accurate as of the date of the Vendor's execution of the contract. This contract supersedes all prior proposals, contracts and understandings between the Parties concerning the subject matter of the contract. This contract can be signed in multiple counterparts upon agreement of the Parties.

1. SCOPE OF WORK

1.1. OVERVIEW AND PURPOSE:

To establish a joint purchase master contract (JPMC) for bulk rock salt to be purchased on an as-needed basis during the contract period.

This JPMC may be utilized by all governmental units as defined in Section 5 of this Contract.

Note: Participation in this contract is based upon the CY25-26 Illinois Department of Central Management Services Joint Participation Agreement Survey that defines the BidBuy line items and additional participation in the resultant contract is not allowed.

1.2. SUPPLIES AND/OR SERVICES REQUIRED:

1.2.1. The vendor will provide bulk rock salt based on quantity ordered within the timeframe listed herein.

1.2.2. Rock Salt Specification Requirements:

1.2.2.1. Rock Salt shall comply with the requirements of The American Association of State Highway and Transportation

Officials (AASHTO) SPECIFICATION M143, SODIUM CHLORIDE TYPE 1, GRADE 1.

1.2.2.2. Rock Salt shall be free flowing fresh stock. Reclaimed or re-crushed rock salt will not be accepted and shall be rejected by delivery site.

1.2.3. Quantity Commitments: All participants who complete the annual survey will have the option to choose between a minimum of 80% or 100% purchase commitment and will be allowed a maximum of 120% purchase commitment as defined below. All minimum purchase commitments will be defined in the line item description within BidBuy.

1.2.3.1. Minimum 80% Commitment: Some participants identified from the annual survey have chosen a minimum purchase commitment of 80%. That means that if the participant estimates a quantity of 100 ton, the participant is only obligated to order 80 ton. That is 80% of the estimated quantity. The participant shall have no further liability to the Vendor for further remaining quantities.

1.2.3.2. Minimum 100% Commitment: Some participants identified from the annual survey have chosen a minimum purchase commitment of 100%. That means that if the participant estimates a quantity of 100 ton, the participant is obligated to order 100 ton. That is 100% of the estimated quantity.

1.2.3.3. Maximum 120% Commitment: The Vendor shall agree to provide up to 120% of the bid quantity estimated tonnage at the same contract price. That means that all participants who estimate a quantity of 100 ton can order up to 120 ton at the same contract price.

1.2.3.4. Quantities Exceeding 120% Maximum: In some instances, a participant may require quantities that would exceed the maximum commitment of the Vendor; in such instances, any delivery shall be made upon the mutual agreement of all parties.

1.2.3.5. Purchase Percentages for IDOT: The Illinois Department of Transportation (IDOT) has provided estimated quantities for individual locations. Quantities purchased from each Vendor shall be computed on a District by District basis (not by location). For example, if a Vendor has 2 locations in a District with estimated quantities of 100 and 200 tons with a minimum 80% commitment. Then the 80% commitment

will be met once the $300(0.8) = 240$ tons has been purchased between the two locations. This may include all 240 tons purchased from one location.

1.2.4. Weights and Measures Requirements and Adjustments:

- 1.2.4.1. Weights and Measures:** All measurements for weight shall be from scales meeting the requirements of The Weights and Measures Act of the State of Illinois (225 ILCS 470). The Vendor shall provide accurate weights of materials delivered to governmental units. These weights shall be documented on delivery tickets which shall identify the source of the material, type of material, the date and time the material was loaded, the release number, the net weight, the tare weight, and the identification of the transporting vehicle.
- 1.2.4.2.** The State reserves the right to conduct random, independent vehicle weight checks for salt deliveries. This will require that trucks occasionally be directed to a scale near the delivery point.
- 1.2.4.3.** Should the vehicle weight check result in the net weight of material on the vehicle to exceed the net weight of material shown on the Vendor's delivery ticket by 600 pounds or more, the State will document the independent vehicle weight check and immediately furnish a copy of the results to the Vendor. No adjustment in pay quantity will be made.
- 1.2.4.4.** Should the vehicle weight check result in the net weight of material shown on the delivery ticket to be less than the net weight of material on the vehicle by the tolerance of 600 pounds or more, the State will document the independent vehicle weight check (IWC1), immediately furnish a copy of the results to the Vendor, and immediately perform a second independent weight check (IWC2). The vehicle will be weighed on a second independent Department of Agriculture certified scale used for the initial independent weight check. If the second independent weight check (IWC2) is within the 600-pound tolerance, no pay adjustments will be made, and random independent weight checks will resume. If the second weight check confirms the net weight of the material shown on the Vendor's delivery ticket is less than the net weight of material on the vehicle by 600 pounds or more, the State will adjust the net weight shown on the delivery ticket to the checked delivered

net weight as determined by the initial independent vehicle weight check (IWC1).

1.2.4.5. Method of Measurement: The State will also adjust the method of measurement for subsequent truck loads using the same scale based on the out-of-tolerance independent weight checks (ICW1). The net weight of rock salt delivered to the State from this source, will be adjusted by applying a correction factor "A" as determined by the following formula:

$$A = [1.0 - (B - C) / B]; \text{ Where } A < 1.0 \text{ and } B - C > 600$$

Where: A = Adjustment factor

B = Net weight shown on the delivery ticket from Vendor

C = Net weight on the vehicle determined from independent weight check from IWC1

The adjustment factor will be applied as follows:

$$\text{Adjusted Net Weight} = A \times \text{Delivery Ticket Net Weight}$$

The adjustment factor will be imposed until the cause of the deficient weight is identified and corrected by the Vendor to the satisfaction of the State. If the cause of the deficient weight is not identified and corrected within seven calendar days, the State reserves the right to immediately, and without notice to Vendor, take action to remedy Vendor failure. This action may include the termination of the order and purchase of salt from other sources, or other action to ensure ice control availability for public safety purposes. Note that any or all additional costs may be collected from the original Vendor, in addition to the applied weight adjustments.

Should the Vendor elect to challenge the results of the independent weight check, the State will continue to document the weight of material for which the adjustment factor would be applied. However, provided the Vendor furnishes the State with written documentation that the source scale has been calibrated within seven calendar days after the date of the independent weight check, adjustments in the weight of material paid for will not be applied unless the scale calibration demonstrates that the

source scale was not within the specified Department of Agriculture tolerance.

1.2.4.6. Deductions: The State reserves the right to assess, and apply if applicable, invoice deductions for the following:

Moisture Content: Deductions by percentage for moisture content based on total weight shall be determined by the following ranges:

<u>Moisture Content (%)</u>	<u>Deduction in Price (Per Truckload)</u>
0.00 TO 2.00	NO DEDUCTION
2.01 TO 2.50	10% DEDUCTION
2.51 TO 3.00	15% DEDUCTION
3.01 TO 3.50	20% DEDUCTION
3.51 TO 4.00	25% DEDUCTION
GREATER THAN 4.01	REJECTION OF LOAD

Sodium Chloride (NACL) Content: The State reserves the right to accept delivery of rock salt which, according to the analysis by The Illinois Department of Transportation, has a Sodium Chloride (NACL) content of less than 95.0 percent, but not less than 90.0 percent. When such reservation is applied, final payment will be made on the following basis:

1.2.4.6.1. When NACL content is between 94.0 and 94.9 percent, the price to be paid shall be the contract price less \$5.00 per ton.

1.2.4.6.2. When NACL content is between 90.0 and 93.9 percent, the price paid shall be contract price less \$10.00 per ton.

1.2.4.6.3. When the NACL content is less than 90.0 percent, the load will be rejected.

1.2.5. Ordering

1.2.5.1. Order Placement: Orders may be placed with the Vendor (Monday-Friday) via telephone, with a written electronic communication (e-mail) to follow. All State agency orders will contain a purchase order generated from BidBuy in addition to an electronic communication (e-mail). Vendors shall arrange for immediate shipment upon receipt of order from an authorized participating agency representative. All

other governmental units will use their own purchase order system.

- 1.2.5.2.** Order Quantities: Orders shall be scheduled in amounts that make up full (22-25 tons) truckloads, orders for less than truckload will not be accepted.
- 1.2.5.3.** Initial Orders: The Illinois Department of Transportation requires Vendors to ship initial fill-up orders prior to October 31st of the current year. If this date has passed prior to execution, we ask that the Vendor(s) start shipping as soon as contract has been executed. Please see the attached file within BidBuy titled "Initial Orders". Vendor(s) shall notify each destination entity when initial shipments are to begin.
- 1.2.5.4.** Seasonal Orders: Non-State agencies reserve the right to purchase up to 50% of the estimated order requirements prior to November 30th of the current year. Vendor shall notify each delivery point of when shipment is to begin.
- 1.2.5.5.** Order Timeline: For an order placed prior to 9:00 a.m. on a given day, that day would be considered as the first calendar day of the seven (7) day delivery period. For an order placed after 9:00 a.m. on a given day, the day following would be considered as the first calendar day of the seven (7) day delivery period, or as amended by order guidelines in Section 1.2.5.6.
- 1.2.5.6.** Order Guidelines: An agency may order up to 20% of their 100% contracted tonnage in any given week and Vendor shall deliver within 7 working days after receipt of order. Quantities ordered above the 20 percent threshold shall have an extended delivery time of one-working-day for each one percentage-point above the 20% guideline. For example, if an agency orders 25% of their awarded total 100 tons, delivery of the first 20 tons (20%) shall be within 7 working days after receipt of order and the remaining 5 tons shall be delivered within 12 working days after receipt of the order.
- 1.2.5.7.** Peak Season Orders: After hours and weekend delivery arrangements are encouraged during severe seasonal weather events to provide Vendor additional ability to maintain a prompt order delivery schedule. Orders placed during peak season should be in accordance with projected requirements and not in excess of the order guidelines,

thereby hindering a Vendor's ability to maintain a prompt order delivery schedule.

1.2.5.8. Post Season Orders: All orders for Rock Salt shall be placed by the end of July for the previous season's estimated usage. If the location does not have adequate capacity to hold the rock salt, the Vendor may elect to add a storage charge per ton/day. Storage for all post season orders shall not exceed a period of six (6) months.

1.2.5.9. Maximum Overage Tonnage Allowed for Quantity Commitments: The Vendor shall deliver within one full truck load of 22-25 tons for each governmental unit's total quantity commitments. All governmental units will be required to pay for any overage tons delivered over the quantity commitment and within the full truck load of 22-25 tons. If the Vendor should deliver more than the max. allowed, then the governmental unit will have the option to request that the Vendor pick up the tonnage amount of rock salt to meet the maximum overage tonnage at no cost to the governmental unit.

1.3. MILESTONES AND DELIVERABLES:

1.3.1. Stockpile and Order Status Reports: Vendor shall provide stockpile and order status reports upon request and as requested by the CMS Bureau of Strategic Sourcing for use in its contract administration effort. Failure to comply in a timely manner may be considered a breach of contract.

The automatic printer shall be an integral part of the scale equipment, or the scale and printer shall be directly connected in a manner that will prohibit the manual entry of gross weights. Tare and net weights shall be shown on weigh tickets and may be printed automatically or entered manually. The State reserves the right to immediately, and without notice to Vendor or subcontractor, take action to remedy Vendor failure of automatic printing. This action may include the termination of the order and purchase of salt from other sources, or other action to ensure all weights and measures are correct. Unless otherwise directed, delivery ticket must also be signed by an authorized agency representative at the delivery location point to verify that agency has accepted the material. The Vendor shall include the release order number and the date of delivery on each delivery ticket. The Vendor shall ensure all weights and measures shown on all tickets are correct.

In the event any agency discovers preloaded rock salt already dumped at its location, the salt may be reloaded onto the cartage hauler's truck by the agency and returned for credit and the Vendor shall immediately ship a conforming load of replacement Rock Salt, or at agencies' option to issue a refund consistent with the dollar amount of the original order.
- 1.5.7. Delivery Method:** All deliveries will be on the basis of the "End-Dumping" method. Vendors shall be governed by the specific delivery instructions, as to unloading point, issued by an applicable agency when they place their order for a particular location.
- 1.5.8. Weights and Measures:** Governmental units reserve the right to require that trucks may occasionally be directed to a scale in the vicinity of the delivery point as a check on delivered truckloads. The governmental units reserve the right to take action to remedy Vendor's failure to provide accurate weights and measures.

Governmental units and Vendor agree that at the time of contracting, the amount of actual damages is uncertain. Governmental units and Vendor further agree that the amount of Liquidated Damages in this Section is reasonable and bears relation to the damages which may be sustained in the event of a breach.

Delivery Failure Damages: If after seven (7) days' assessment of Liquidated Damage claims, a Vendor has still failed to deliver as required, governmental units reserve the right to immediately, and without notice to Vendor, take action to remedy Vendor failure. This may include the termination of the order and purchase of salt from other sources, or other action to ensure ice control availability for public safety purposes. Note that any or all additional costs may be collected from the original Vendor, in addition to the applied Liquidated Damages.

Summary

53rd Street Water Main Replacement Project

It is anticipated that the start for the replacement of the 8” water main on 53rd Street between Commonwealth Avenue and Fair Elms Avenue will begin the week of October 13th. Materials for the project are being acquired, and product specifications and submittals are due to the Village. V3, the engineering firm performing design and oversight of the project, are finalizing the surveys needed for the temporary easement agreements. Once Mauro Construction and their subcontractor, Airy, begin construction, the project will take approximately 3–4 weeks to complete.

Phase 1 Lead Replacement Project

Millennium Construction continues to replace the remainder of the lead services in the phase 1 project. All 42 services and all restoration will be complete by the end of the month. As of 10/01/25, nearly 75% of the lead service lines for the project have been disconnected and replaced.

RO Skid 4 Membrane Cartridge Replacement

Last month, Municipal Services reported on the recommendation to replace the membrane cartridges for the Reverse Osmosis Skid used in treating Well 4. Preliminary costs are anticipated \$120,000.00. for materials and labor. Our membrane cartridge distributors are looking into options for the best cartridges that will meet and/or exceed current operations with the raw data provided to them. One distributor has the existing Toray filters in stock and is determining if this is still the best filter within the Toray product line.

Water Plant and Well 5 Tour to Local Girl Scout Troop

On Monday, September 22, the local 3rd grade girl scout troop from Field Park Elementary School took a tour of the water plant and well 5. The twelve girls and their chaperons learned how water is pulled from our 1900’ deep aquifer, transported to the treatment plant, and the steps, equipment, and processes it takes to treat and provide safe drinking water. The group also performed some testing to determine the chlorine residual, alkalinity, and pH. Other topics included water conservation, waste water from the treatment process, and the importance of keeping our storm water basins and areas safe as this water can affect our creeks and rivers. The troop will decide on a group project to conclude their unit and to earn a badge.

Well Preventative Maintenance from Water Well Solutions

Water Well Solutions completed their preventative maintenance assessment on Wells 3,4 and 5 on 09/25-09/26. The report will be sent later this month. It was determined by the field staff that all three (3) wells are in good condition for electrical amperage and voltage readings while in operation and that the aquifers have ample water over the pump associated with drawdown. Well #1 was not performed as Baxter and Woodman are working on the abandonment study.
